One Third Reduction in Light Rate Effective From July 1

Substantial Cut Made in Anticipation of Increased Use by Consumers--Townpeople Express Satisfaction With Franchise Revisions--Company Reduces Household Light, Power and Street Lighting

Greater Use of Electric Power Will Result in Cheaper Rates

"The business of persuading the public to use more electricity is of vital concern to utilities simply because sales above a given volume are practically all clear profit. According to many utility authorities, increased consumption is the answer to the public demand for lower rates."

Mr. Samuel Ferguson, president of the Hartford Electric Light Company, recently stated: "Our ultimate goal is complete electrification of every home, thus securing for the people cheaper and more abundant power."

Coleman consumers might take note that to justify lower rates, greater volume must be shown. It works to mutual advantage, particularly to consumers, who must pay overhead costs no matter if the volume be big or small.

Ratepayers Meeting

A ratepayers meeting on Tuesday evening in the Community hall approved the proposed revised rate schedule agreed on between the council and Coleman Light and Water Co., whereby a reduction of approximately one third will come into effect on light rates as from July 1.

Mayor Pattinson presiding, called on E. D. Battrum, town auditor, to explain the financial record of the operations since the franchise was granted in 1924. The amount of capitalization, interest, earnings power, depreciation or amortization and repairs to the system were clearly explained.

An important factor in enabling a rate reduction to be made is that the period of amortization has been extended a further ten years over the original twenty years of the franchise of 1924.

Water rates could only be reduced by more consumers being added.

There are 90 houses on the water line not taking the service, though when the system was installed it was anticipated they would remain as steady consumers. If these were again connected, and the system relieved of schools taxation, a reduction of 18 per cent would be possible. The big cost was pumping, which according to the records showed an average annual cost of \$4560.00. One year it reached \$9,000. It was believed that this yearly average could be reduced, if co-operation of consumers is secured. The waterworks had all ways shown a loss, which was made up from light revenue surplus.

Another item added to consumers costs was \$5,000 which was incurred by a hearing before the Utility Commissioners in 1927. The present negotiations between the town and the company, and the hearing before the Utility Commissioners would not cost such a large sum, each side agreeing to pay its own costs. As negotiations up to the present have been conducted direct between representatives of the council and the company, heavy costs have been avoided.

Mr. Battrum said that some had suggested that the company might secure power at a cheaper rate, thereby enabling a further reduction to be made. He pointed out that other big power companies in Alberta were charging to the towns they served in bulk 3 1/2c per kilowatt, whereas Coleman Light and Water Co. was purchasing at 2 1/2c. The latter rate was approved by the Commissioners.

Discussion followed Mr. Battrum's address. Frank Barrington

Example of the new light rate compared with former rate:
Under former rate \$10 purchased 83 kilowatts.
Under new rate \$10 purchases 139 kilowatts, an increase of 56 additional kilowatts for \$10.

John Pratt Injured

John Pratt, employed on survey work in McGillivray mine, was seriously injured on Tuesday morning and will remain in hospital for some time. With Hector McDonald it is reported he was taking measurements in the mine, when a horse, startled by an unusual sound, became frightened and ran into Pratt and McDonald. The latter was slightly injured, and was able to proceed home.

The nature of Mr. Pratt's injuries were not disclosed, but it is reported his back and one leg were badly injured, necessitating his being placed in a cast.

It Really Is a Very Pretty Garden

Transforming a piece of ash and broken bottle covered ground into a lovely flower garden is the creditable work of J. L. Lonsbury at the rear of his house on Second Street. When he moved in it was just a piece of scrub stony land. Now he has beautiful blooms, including even the Rose of Sharon, sweet peas, snapdragons, and many other types of fragrant flowers. Small trees which he planted at the back of the lot will give him shade trees in a few years if they continue their present rate of growth. There is indeed joy in a garden.

MISCELLANEOUS

Dr. C. Purdon, Howard Sparkes, S. Krivel and Howard Patten, publisher of the Estevan News, called on The Journal this week. They were enjoying a motor trip through eastern British Columbia and Alberta after attending the Dominion convention of the Benevolent and Protective Order of Elks at Jasper Park. The trip via the Banff-Windermere highway and through the Crow's Nest Pass they described as the most interesting of their long trip from Estevan. They planned on returning via Waterton and Glacier parks.

"From Fort St. John, Peace River Block, 564 miles north-west of Edmonton," were the words printed on a covered wagon which passed through town on Monday morning going westward. The outfit had been since May 23 on the road.

"These are genuine Canadian Maple leaves," stated Albert E. Knowles to The Journal, as he displayed branches of trees which he had cut in the vicinity of town. They were splendid specimens, and many would appreciate these trees for ornamenting their gardens.

Mr. and Mrs. Frank Celli of Creston spent a few days here this week visiting friends, returning on Wednesday. The fruit industry has been good this year, stated Mr. Celli. Up until a few years ago he operated the Palm Confectionery here.

Leslie Griffiths, son of Mr. and Mrs. J. Griffiths, of Coleman, and Virginia, second daughter of Mr. H. Olson, of Midnapore, were married in Calgary on Tuesday. Miss Mary Griffiths, sister of the bride, groom, and Tom Blower, were bridesmaid and best men. Good wishes go to the happy couple from Coleman friends.

Attempted Burglary Is Foiled By Vigilance of Woman Above Store

Burglar Apparently Had Knowledge of Layout--Broke Glass Panel Above the Door Bolt

About 1.30 a.m. Sunday, Mrs. H. Gate, who with her husband lives above Webster's store on Main street, was awakened by what she thought was a knock at the back door downstairs. Almost immediately following this she heard some one moving in the store below. She immediately arose and leaving the rear of the building hurried through the lanes and around to Mr. Webster's house, which is across the road from the store. In the meantime her husband came downstairs and caught sight of a man leaving the rear of the building, but did not see sufficient of him to identify him.

He had entered by breaking out a piece of glass above the bolt which fastens the door, so it was an easy job to enter the store. The combination of the safe had been moved but the thief had not sufficient time to do anything further. It is considered that the attempted theft was committed by someone with a knowledge of the layout of the place and investigation is being carried on by the police.

ST. PAUL'S UNITED CHURCH
Rev J. Wood of Hillcrest will preach in the morning.

The Oxford group of the Pass will have charge in the evening. There will be solos sung and some good testimonies given.

Twenty Years Ago

20 years ago, on August 4, Great Britain declared war and the "First Hundred Thousand," the "Old Contemptibles," began to move across the channel to Belgium and France. They marched up to Mons singing "It's a Long Way to Tipperary," but in three weeks they were forced back, over the ground they had traversed, to the Aisne. Over four years later the Canadian Corps marched into Mons as part of the victorious army. The war which was fought to end war proved a delusion as far as settling international disputes is concerned.

Prosecutions Against Live Stock Ramming in Town

A man living on Hairmore road was prosecuted this morning for allowing his cattle to run at large in the town limits. A boy from East Coleman paid 50c pound fees for his calf being taken up by the police and let off with a warning that prosecution would follow if it was again taken up. Council has instructed Constable Houghton to prosecute without further warning owners of horses and cattle who permit same to roam in the town, and which have been the cause of numerous complaints for years.

An improvement much appreciated by the hospital staff is the installation of an announcer system, whereby every bed has a push button so that the nurse on duty may know from which bed a call is made, there being an indicator in the office. The system was installed by E. V. Peet, local electrician.

Balloch Loses Tennis Singles Championship to Stark of Calgary

Charlie Roughhead Wins Southern Alberta Junior Championship--Heat Was Intense

Coleman tennis players took part in the S. A. T. T. in Lethbridge last week and were successful in winning four events.

Balloch lost his singles title to Stark of Calgary. Stark is a greatly improved player since last year and his tack was lightened considerably when he caught Balloch off form.

The men's doubles was won by Balloch and Richards who played brilliantly to beat Richards and Hinks. The net play of Richards featured this match, Hinks and Stark often conceding the point by making no effort to return the ball.

"Chick" Roughhead realized his ambition to become southern Alberta junior champion when he defeated Coloe of Fernie in the final.

Coleman players were to the fore in the secondary events. Bell and Shone lost to Ferguson and Kwasnie in the finals of the mixed doubles 7-5, 7-5.

The finals of the ladies secondary singles was a hard battle between May Bell and Joy Ferguson. May played strongly to win the first set. Joy settled down in the second to play a steady game to win the set. Joy took a 3-0 lead in the third set when May started a rally to win four straight games to lead 4-3. May ran her service to 4-0 when she faltered allowing Joy to come from (Continued on Page Eight)

Stratosphere Balloonists Save Their Lives By Landing In Parachutes

Holdrege, Wis.—The \$60,000 "Explorer," largest stratosphere balloon ever built, is a wreck, its vast gas bag in bits and the ten of costly scientific instruments inside its gondola, smashed. But its crew who suddenly returned to earth from a 60,000 foot dash into space, were alive and well. Major William E. Kepner, pilot, Captain Orvil A. Anderson and Albert W. Stevens again felt mother earth under their feet by grace of the slow break-up of their space ship and three skilful parachute jumps.

The adventure which began near Rapid City, S.D., at 8:45 a.m., C.S.T., July 28, and ended after 10 hours and 15 minutes on the farm of Reuben Johnson near Loomis, for sheer drama shaded an H. G. Wells' scientific romance.

Friends of the three seekers after a stratosphere record and knowledge as to the queer conditions outside the little world were able to listen to conversation in the gondola during the flight. When the balloon began to rip open, they heard one of the men remark, "this damn thing has gone nuts."

The balloon, slashed by ribs about 2,137 feet under the American altitude record set by the Seattle light last year, burst wide open at 5,000 feet and sent the gondola flattening out like a squash toward the ground.

Last of the messages received before the balloon and gondola separated was from Kepner.

"We're at 10,000 feet. Ready to jump."

Partholes in the eight foot gondola were opened. Anderson was thrown clear by a jerk of the gondola, his parachute ready to carry him to safety.

Kepner and Stevens clung to the swinging ball, attempting to release the huge chute with which it was equipped to ease the globe earthward with its delicate instruments. Then they saw their efforts were futile. They bailed out—Kepner just in time to have his chute open.

Kepner gave a graphic account of the battle against death.

"We looked through a window and saw a hole 50 feet long," he related. "We sat and sort of waited to see if we were going to come down in the gondola at about a mile a minute and would have to get out."

"At that height a man can not live. At 20,000 feet we opened our gondola and got out on top and looked around and thought then we might be able to land it and save the instruments."

"But the speed we were coming down—500 feet a minute although sometimes it was not over 300—a parachuting effect which was too much for the balloon. It tore out all the lower part and just left the upper part like a parachute with a little hydrogen floating in it."

Anderson said, "had not trouble developed we possibly could have gone 15,000 feet farther and we might have reached an 80,000 foot ceiling which would have been a new world's record."

"As we no longer had a balloon," Anderson continued, "but only a parachute we could not help matters by staying in the gondola, so we agreed to bail out to lighten its load in the hope it would come down slower and perhaps the instruments could be saved."

Says Canada's Future Must Be Based On Mutual Understanding

Field, B.C.—"If the confederacy of Canada is to endure it must be on a basis of mutual understanding and fairness," Premier T. D. Pattullo of British Columbia emphasized as he halted briefly on his way to the Dominion-provincial unemployment relief conference at Ottawa.

"We are today sitting on a volcano with America fast drifting toward the condition of Europe and apparently everybody helpless," he said. "So far as British Columbia is concerned, we are one of the most favored parts of the world in respect to natural conditions, but in our own small way we must play our part in the present world economy."

Referring to a despatch which said he had his ministers were going

Famine In Russia

Statement Says Not Less Than Five Million Persons Have Died

Montreal.—On a mission to awaken public opinion to necessity for aiding famine sufferers in Russia, Dr. E. Ammend, secretary of the international aid committee, was in Montreal recently.

The committee hoped, he said, to have surplus grain sent to Russia. Clergymen in Western Canada were interested in the project following his trip there, he said.

"Not less than 5,000,000 persons have died from starvation since 1933, the year our committee was formed," he claimed. "The next famine will be far worse than anyone can imagine. It has already assumed so serious an aspect that the Russian government has actually admitted there will be one, after doing its best to conceal the fact since our committee was formed."

"The areas affected are all near the Black Sea ports of Odessa and Rostov," he added, "which would simplify redistribution of grain."

England Gets Heavy Rain

Traffic Held Up And Lightning Causes Wide Damage

London.—Great thunder and rain storms have swept England, breaking the long drought and leaving everywhere a trail of havoc.

London experienced a downpour of tropical intensity and many roads were quickly under several inches of water. Traffic generally was held up, underground and surface train services were disrupted.

Hammersmith bridge was struck by lightning and cables underneath it caught fire, being extinguished by a fire brigade.

A thunderbolt fell in a suburban hall and set it afire, scores of houses and shops were damaged by lightning, and many homes and buildings were flooded.

Indian To Become Priest

Alberta Cree Completes Studies And Is Joining Oblate Order

Montreal.—The fourth Indian to become a priest of the Oblate order, Rev. Patrick Mercredi was in Montreal recently on his way to Normandin, Alberta, where he will be ordained by Mgr. Breynat.

Mr. Mercredi, a Cree Indian, was born in Normandin and was educated at Indian schools in the MacKenzie district, at Edmonton and at St. Laurent, Man. He has just returned from France where he completed his theological studies.

War Is Impossible

French Opinion Is That There Is No Immediate Danger

Paris.—The French foreign office declares war is "impossible" as an immediate result of Chancellor Dollfus' assassination.

Pence, instead, it was said, was strengthened by the "failure" of Austrian Nazis and world wide disapproval of the German campaign against the little dictator.

Hitler was described by other officials as suffering a "striking defeat."

World Wheat Shortage

Extra Needs Shown In New Statistical Survey

London.—Wheat-starved countries of the world will have to depend for extra needs on Canada and Argentina, a new statistical survey reveals.

Weather conditions have cut down the crop in the United States, completely changed the average favorable outlook in the Danube basin, made crop forecasts in Russia extremely uncertain and assured only mediocre production in Australia.

Even Canada's crop has been reduced considerably by heat waves of recent weeks.

What experts here have watched a steadily mounting total of reports in recent weeks indicating disastrous inroads made by weather on previous production estimates. Prices are going up, with over last week's figures. It would appear that nearly every wheat-producing country has been more or less affected.

According to British government statistics, the estimated seasonal total of 483 million bushels shows a reduction of 150 million bushels for domestic consumption, and hence there will be virtually no wheat in the United Kingdom available for export, as reserves must be held for next season as usual.

Made Clean Sweep

Stock From Prince Of Wales Farm Taken Honors At Saskatoon Fair

Saskatoon.—Stock from H.R.H. Prince of Wales farm at High River, made a clean sweep of the best classes of Shorthorn cattle at the Saskatoon exhibition. In the individual classes, however, F. H. Deacon, Unionville, Ontario, secured premier honors, taking the grand championships, male and female, with his senior champions. The E.P. ranch excelled in the younger animals, having the reserve grand in the junior champion male and female and heading the female two-year-olds. Duncan Campbell Farms, Moffat, Ont., took reserve female and T. A. Russell, Downsview, Ontario, the senior reserve male.

Pool Payment

Final Cash Payment Received By Alberta Farmers

Calgary.—Cheques representing final cash payment on the 1933-34 voluntary pool have been mailed to all participating members by the Alberta wheat pool. The aggregate amount was not announced.

The final payment on No. 1 Hard was 18.317 cents, making the net total payment 68.317 cents per bushel, while for No. 2 Northern it was 15.063, for the total payment 65.063 cents per bushel.

Pool officials announced the initial payment on deliveries of wheat to the 1934-35 pool had been set, for the time being, at 35 cents per bushel.

Wheat Control Plans Changed

United States May Return To Normal Acreage Next Year

Washington.—A sweeping change in the United States government's wheat control tactics was under consideration as the drought tightened its disastrous grip.

Instead of plowing under to cut the crop, officials studied a plan to return to almost normal acreages next year—but with an ace in the hole. If restricted production were found necessary, part of the crop would be harvested while still green to be used for forage.

Uncertainties in the world wheat situation, as well as lessons learned from the drought, influence the plans.

MEMBERS OF SASKATCHEWAN CABINET

Left, R. J. M. Parker, veteran member of the Saskatchewan Legislature, who is Minister of Municipal Affairs in the new Liberal Cabinet and, right, Dr. J. M. Uhrich, Minister of Public Health. Dr. Uhrich, who held the portfolio prior to 1929, is a Rosthern physician.

HON. HUGH ALLEN

New Minister of Lands and Mines and of Municipal Affairs in the re-organized Alberta Cabinet. Born at Stella, Ontario, Mr. Allen is a graduate in chemistry who took up farming in the Peace River country. He was elected M.L.A. for Peace River in 1926, and in 1930 was returned by acclamation for the new riding of Grande Prairie.

Aspects Of A Desert

Conditions In Southwestern Manitoba Said To Be Bad

Winnipeg.—Southwestern Manitoba is taking on aspects of a desert as the drought-stricken district this year has extended over a greater area than ever before, says a summary of crop conditions issued by the Manitoba department of agriculture.

A strip of land 20 to 40 miles wide along the international boundary shows scarcely a single good field of grain. Soil drifting was followed by clouds of grasshoppers and hot, parching winds have withered whatever crop promised to mature.

"There really is not a single district west of the Red River valley close along the boundary that has anything like a decent crop," the summary says. Wheat "might" yield five to 10 bushels an acre and oats and barley barely sufficient for seed purposes.

In the northern and eastern sections of Manitoba, conditions show sharp improvement. Conditions are good in the north, though more rain is much needed.

Japan Makes Final Offer

Wants Definite Answer From Moscow On Railway Question

Tokyo.—A spokesman for the foreign office revealed Japan has sent to Moscow a proposal demanding a yes-or-no answer on the potentially dangerous problem of disposal of the Chinese Eastern railway in Manchukuo.

The proposal was in the nature of a final offer to the Soviet government, the spokesman said, on protracted negotiations involving the transfer of the railway to Manchukuo. The line formerly was jointly operated by China and the Soviet.

It was made clear Tokyo considers that upon Moscow's answer depends whether the negotiations, already drawn out for 15 months, will be abruptly terminated, producing a dangerous strain upon Russo-Japanese relations, or their speedy and successful termination assured.

Lost Gold Mine

Winnipeg.—William Alfred Frenton, former Conservative member for Port Frances-Kenora in the Ontario legislature, celebrated his 86th birthday in a search for a lost gold mine in the Lake of the Woods area. He has gone to Kenora where an effort will be made to locate outcrops of gold that years ago nearly made a miner out of him instead of a politician.

Expansion Of Trade Needed For Recovery, Says Walter Runciman

To Aid Stock Feeders

Credit Corporation May Help Farmers Through Winter

Regina.—Provided reasonable assurance of the safety of investments is given, the Dominion Agricultural Credit Corporation has decided on a policy of advances to stock breeders and farmers to assist them in carrying young cattle through the winter. The decision was reached at a meeting of directors here.

An important decision which will in time affect the cattle industry of the three Western provinces, it is expected to result in the placing of between 900 and 10,000 cattle on feeder farms chiefly in Saskatchewan and Alberta this coming winter. The meeting and discussion that resulted in this decision were urged by W. W. Sharp, Stettler, Alta., president of the corporation.

In all three provinces there are many breeders who have not the feed to carry their stock and who would be therefore compelled to sell on the fall market for what they can get. There are also many farmers having ample feed but no money to buy cattle. This aim of the corporation is to bring these two together.

Royal Air Force

Says Recent Decision To Add 41 Squadrons Justified By Events

London.—Civil war in Austria and the international tension that goes with it vindicate the British government in its recent decision to add 41 squadrons to the Royal Air Force, Lord Halifax, secretary of education, declared in an address delivered at York.

"No one who looks at the face of Europe now can mistake the frown upon it," he said, "and within the last 48 hours we have again been reminded that there are powerful elements in Europe that accept the historical philosophy that killing in war is not murder."

To Battle Soil Drifting

Federal And Provincial Governments Being Asked To Co-operate

Winnipeg.—Co-operation of federal and provincial governments on the problem of soil drifting was sought here by Dr. E. S. Hopkins, of the Dominion experimental farm at Ottawa, now on a survey trip across the prairie provinces.

He planned to confer with agricultural officials of the Western governments, and discussed the situation here with J. H. Evans, deputy minister of agriculture in the Manitoba government.

U.S. Sends Sympathy

Washington.—President Roosevelt and Secretary of State Cordell Hull despatched messages expressing the sympathy of the United States government and the American people on the assassination of Chancellor Dollfus to President Miklas of Austria.

Powers Abandon Thought Of Joint Action In Austro-German Situation

London.—Great Britain, France and Italy were represented in authoritative British quarters as satisfied with the elevation of Prince Ernst von Starbemberg to the head of the Austrian government in place of slain Chancellor Engelbert Dollfus.

The three powers which have undertaken to guarantee the integrity of Austria, it was stated, will abandon any thought of joint action into the Austro-German situation on the grounds the Nazis have done themselves more damage than could possibly be inflicted from any other quarter.

"It is agreed that it is the wisest policy now to let the Nazis stew in their own juice," said one source close to the British government. "They harmed themselves immeasurably by showing how weak they really are—much weaker than were the Socialists whom Dollfus smashed last February, and by forcing an estrangement between Germany and Italy which may be expected to gradually widen in the future."

Munich, Germany.—No authentic

London.—"There has been an unmistakable improvement," declared Walter Runciman, president of the Board of Trade, as he reviewed the position of British trade in the House of Commons.

But his optimism was tempered with a note of caution. The first care of the National government had been to develop the home market, he pointed out, but now he questioned whether the saturation point had not been reached. He doubted the home market could be unduly expanded further without endangering export trade.

The home market, said Mr. Runciman, could not itself bridge the unemployment figures substantially below the 2,000,000 mark. Reduction below that figure must come from expansion of Britain's international trade.

"I do not think," he added, "there can be any great improvement in world trade until we reach calmer times. All adjustments of market restrictions are only alleviations. They cannot effect a permanent cure."

The British government, he concluded, had secured confidence at home. Its policy now was directed to maintain that confidence at home, and restore confidence abroad.

Appoint Guardians

Protection To Be Afforded The Dionne Quintuplets

Toronto.—In an effort to prevent the famous Dionne quintuplets of Corbeil from "certain death in some vaudeville show," Attorney-General Arthur W. Robuck obtained an order appointing guardians for the five two-month-old daughters of Mr. and Mrs. Olive Dionne.

The order, obtained from District Court Judge H. D. Leask, named as guardians Dr. Allan Ray Dufosse of Callander, the northern Ontario physician, credited with keeping the infants alive longer than any other known quintuplets; W. H. Alderson of the Red Cross emergency committee; Kenneth Morrison, Callander merchant; and Oliver Dionne, the babies' grandfather.

Britain's Farm Policy

Boosting Domestic Production Raising A Serious Question

Oxford, Eng.—The agricultural policy of Britain, one of boosting domestic production, is raising very serious questions for the overseas empire, declared Stanley Bruce, Australian high commissioner.

He told the Royal Empire Society's summer school here he agreed it was essential that "in these islands you have healthy agriculture, and I assure you you will have the complete co-operation of the Dominions."

He pictured Britain as the centre of a great group of agricultural countries with Britain giving them the opportunity of selling their products in exchange for her manufactured goods.

Powers Abandon Thought Of Joint Action In Austro-German Situation

London.—Great Britain, France and Italy were represented in authoritative British quarters as satisfied with the elevation of Prince Ernst von Starbemberg to the head of the Austrian government in place of slain Chancellor Engelbert Dollfus.

The three powers which have undertaken to guarantee the integrity of Austria, it was stated, will abandon any thought of joint action into the Austro-German situation on the grounds the Nazis have done themselves more damage than could possibly be inflicted from any other quarter.

"It is agreed that it is the wisest policy now to let the Nazis stew in their own juice," said one source close to the British government. "They harmed themselves immeasurably by showing how weak they really are—much weaker than were the Socialists whom Dollfus smashed last February, and by forcing an estrangement between Germany and Italy which may be expected to gradually widen in the future."

NOTES AND COMMENTS

FOREST Fires bring anxiety to forest rangers and all who love the attractions of the forest. The first in this district on Sunday afternoon necessitated calling men from relief camps and they will likely be kept on the fire line till the danger point is passed. Only soaking rains will eliminate the hazards caused by a spell of exceptionally hot weather. Carelessness is reported to have caused Sunday's outbreak. It is a criminal offence to leave ashes or burning cigarette stubs in the forest. Human carelessness causes far more damage than is occasioned by natural causes. Everyone should co-operate to save the woods by helping to bring offenders to time, for the forests are far too valuable in asset of the people's to be ruthlessly destroyed by criminally thoughtless persons.

PUBLIC OPINION throughout the world where motion pictures are shown indicate keen agitation for better films. That instead of playing down to depraved taste with gangster, sex and wild western types of pictures, pictures appealing to the higher traits in human nature be produced. Actors even complain they are compelled to play parts for which they have no enthusiasm, but they either have to accept or get out. A writer with experience of Hollywood states:

"I never met one who wouldn't rather play up to a more intelligent level, if only 'they' the owners of the money bags would let him do it. I found one actress, who is notorious for the coarseness of her roles, in tears because the producers would not let her do anything different. She was under contract. She could play 'box-office' parts and give the public what it wants or get out. Avarice has been the fault of cinema production. Its other troubles are all subordinate to that. Avarice, in the whole history of the human race, has not produced one bright idea or carried out, which is the expression of genuine civilization, one step forward. Avarice blinds its vision, and where there is no vision the people perish. Art perishes first."

"THE world is constantly advancing. Progress is inevitable. A world whose thought did not change would become as a stagnant pond. The rejection of outworn beliefs and the substitution of higher ideas is indicative of the progress. One by one man's fetters fall."—Christian Science Monitor.

RED DEER recently celebrated its jubilee, and The Advocate, its weekly newspaper, published a special edition of 48 pages of interesting reading and advertising matter. It was a demonstration of newspaper enterprise and also enthusiastic support by the merchants and business men reflecting the progressive spirit of the entire community. It was a splendid example of the well-known fact that it is not towns or cities which make men—it is the men who make the place in which they live and do business more than a mere dot on the map. Every business man with progressive ideas can by his service and interest in his community best serve himself to develop business by that most valuable of assets—goodwill.

DISCUSSION at the ratepayers meeting arose because a ratepayer of the school district not subject to municipal taxation wanted to know why the Coleman Light & Water Co. should be relieved from school taxation. To which the question is asked by consumers of light and water—why should they pay through their monthly bills over \$1,000 in school taxes which results in higher rates for light and water?

TO EFFECT further economies in operation to enable a reduction in rates to be maintained, co-operation of water users is asked during times when it is necessary to use the big pump for distribution. Under a flat system, either for light or water, far more is used, at times extravagantly than under a meter system. Reduced rates which all clamor for on water do not appear likely owing to the fact that the loss of the water system is made up from the surplus of the lighting system. If water meters were installed undoubtedly pumping costs would be considerably reduced. Cooperation is essential to eliminate waste.

INCREASED use of light and power will help to reduce rates. Experience of companies has proved this. A company in the United States installed electric ranges without cost, charging 10¢ per week rental. Increased profits to the company resulted by increased volume and reduced overhead costs. At the same time the consumer enjoyed the facilities which cheap power permits. There is a field in Coleman for greatly increased use of electric appliances, which a lower rate would greatly encourage.

AUDITOR BATTUM'S review of operations of Coleman's power system cleared away many misconceptions regarding the company's attitude towards consumers. For a few years following the granting of the franchise, very little check was kept by the council on operating costs,

though they had access to any information required. He pointed out that closer co-operation between the town and the company should pave the way for lower rates, and the company would not, as some inferred, impose any greater cost on the consumers than was necessary to give a legitimate return on the cost of the system and its operation.

SUMMING up the negotiations between the council and the company, it would appear that a very satisfactory revision of rates has been secured, which, if consumers will do their part will react to their benefit. The prompt and ex-

peditions manner in which the negotiations were completed merit the approval and confidence of the people.

Orders for Gunned Paper for printing machines may be filled at The Journal Office. Plain or printed paper may be supplied at lowest current prices. Printed gunned paper orders should be given one month ahead of requirement, as it takes that length of time to get the orders through the factory.

GOOD STYLE

"You can't Stop stoking a steam engine" said Wrigley

ASKED to what he attributed his phenom-
enal success, the late Mr. Wrigley, of
chewing gum fame, replied, "To the
consistent advertising of a good prod-
uct." "But," asked the reporter, "having cap-
tured practically the entire market, why con-
tinue to spend vast sums annually on adver-
tising?"

Wrigley's reply was illuminating.

"Once having raised steam in an engine," he
stated, "it requires continuous stoking to keep
it up. Advertising stokes up business and keeps
it running on a full head of steam."

WORLD HAPPENINGS
BRIEFLY TOLD

An unusually severe heat wave in France caused the 984-foot Eiffel Tower to stretch eleven inches upward between sunrise and sunset, engineers said.

The total cost of Great Britain's extended air force program up to 1938 will be about \$100,000,000, the house of lords was informed by the secretary for air, Lord Londonderry.

France has decided to invite all the nations of the world to take part in a great international exhibition in Paris in 1937. Its estimated cost is \$20,000,000.

The British Columbia canned salmon pack during the year ending June 30, 1934, totalled 1,003,929 cases, the Vancouver Merchants' Exchange reported.

In the preceding year the pack totalled 830,256 cases. Hundreds of acres of sugar beets that failed to germinate because of the drought, have been plowed under by farmers in the Chatham district, according to W. H. Riddle, of the Ontario department of agriculture.

Premier T. D. Pattullo of British Columbia announced that a mountain in Mount Robson Park in British Columbia was named "Mount George Graham" in honor of Rt. Hon. George P. Graham.

Establishment of a free wheat market in the Soviet Union has been announced, and will take effect after the delivery of the present harvest. The decision was made in June by the Communist party congress.

Hon. Irene Parilly, U.F.A. member for Alia and winter without portfolio in the provincial cabinet, announced at a U.F.A. constituency convention that she would not stand for nomination again.

Italy has accepted the British government's invitation to engage in conversations prior to the 1935 naval conference, and the Italian delegation will be in London at the end of the summer or the beginning of the fall.

Ramatch Chawla, the first Indian to make a flight from India to England, has started on the first stage of his planned flight around the world. He is going first through Baghdad, Aleppo and Istanbul, travelling eastward.

Canada's total exports of paper and manufactures of paper during June were \$7,277,892. This was lower than in May when the total was \$8,074,867, but considerably greater than June of last year when it was \$5,988,610.

A Unique Donation

How Dr. Grenfell Procured Radium For His Work In Labrador

How Sir Wilfred Grenfell once converted pearls into radium is another of that Labrador physician knight's almost inexhaustible anecdotes, and he told this one as he sailed aboard the steamer New Northland for his forty-something year in bleak Labrador.

"It was in Pittsburgh," Sir Wilfred recalled, "and the women there were not only exquisitely gowned but a number of them had long strings of pearls. 'Ladies,' I said, 'if each of you would give me just one pearl from those strings on which there are so many, I could buy some radium and fight cancer at my hospital.'"

Sir Wilfred said it was agreed. He got the pearls, and bought the radium.

Unearth Sea Serpent

Ancient Specimen Is Discovered By Geologists In Alabama

What may be the "daddy" of sea serpents, a mosasaurus, has been unearthed in exploration of the Alabama geological department, Dr. Walter L. B. Jones, state geologist, disclosed recently.

"We have already taken out 10 feet of a 35-foot mosasaurus near West Green, in Greene county, that probably is 70,000,000 years old," Dr. Jones said.

"And in the same county near Eutaw, we have unearthed a two-ton turtle, possibly as old. Both were encased in chalk of the cretaceous age."

"Then there was the plumber's daughter who went to church without her bridal veil."

"Yes, and had to go back for her tulle!"

The Canadian milling industry provides a market for about 15 million bushels of Canadian grown barley in the manufacture of food products and feeds.

Wheat Champion

Elfron Grower Is Winner At Saskatoon Exhibition
Frank Isaacson, Elfron, Sask., winner of the world's championship at Chicago in 1933, was made wheat champion at Saskatoon industrial exhibition. The sample of Reward wheat shown by Mr. Isaacson is possibly the same as captured the Chicago honor. H. J. Davies of Edfield, a nearby district, was second and Kalman Backsai, Lesak, provincial champion, was third in the Reward class.

In Marquis, C. H. Conn, Aberdeen, had first place with K. Conn of the same district second.

H. G. Newfield, Codette, who talks of a 40-bushel crop on his farm in the far northeast this year, was the leader in oats, and E. Thompson, Pathow, won the Speers trophy for the best peck of barley with his six-row sample. H. A. Myers, Vanscoy, led in two-row barley.

By Ruth Rogers

THE SAILOR "GAL" DRESS A FAVORITE WITH GROWING DAUGHTER—IT'S SO SMART—PRACTICAL

Here's an attractive little model. Little daughter will be so proud to wear it. Don't you think it really lovely? And it's so easily fashioned for a very small outfit. You'll be surprised.

It can be white linen, peasant cotton, pique, lawn, etc. Make the sailor collar, tie and belt of navy blue. A blue leather belt can be worn, if you prefer it.

The tailored sleeves with plaits are especially smart and cool. Similar plaits in the skirt allow plenty of freedom for active play.

Another nice idea is to carry it out in nautical blue and white dotted pique with white pique trim.

Style No. 435 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 2 1/2 yards of 39-inch material with 1 yard of 39-inch contrasting and 3/4 yards of braid.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Little Journeys In Science

RAYON

(By Gordon H. Guest, M.A.)

Rayon, or artificial silk, which has become in recent years a widely used product, resembles good paper in that it consists of pure cellulose. Four different processes have been perfected for its manufacture, but of these the viscose process is used for over 80 per cent of the world's rayon production.

High grade bluishwhite wood pulp (usually taken from spruce trees), is the starting point for the production of artificial silk. Canada supplies almost 40 per cent of the world's requirement of wood for this purpose.

This material, which consists largely of cellulose, is treated for two hours with a weak solution of caustic soda, which results in the formation of alkali cellulose. Surplus moisture is squeezed out of this alkali cellulose, and the material is then torn to shreds, which are left for 24 hours in a closed vessel.

A liquid known by chemists as carbon disulphide is now added, producing a solution called viscose. This solution is allowed to "ripen" for a day or two, after which it is ready for spinning. This is accomplished by forcing the viscose through fine holes, into a preparation of dilute sulphuric acid. The acid causes the fine jets of liquid to change into threads, which are spun into the material we know as rayon.

This artificial silk is altogether different from the natural product. It lacks the tensile strength of pure silk, but it has a fine appearance, and this combined with its cheapness, has led to it being used extensively either alone or as a mixture with wool or cotton.

Noted Talking Bird Dead

Provided Amusement For Many Visitors To St. Louis Zoo
Jocko, famous talking Mina, one of the various Oriental starling-like birds, at the St. Louis Zoo, is dead from old age.

Jocko amused zoo visitors for six years. His repertoire included the following phrases: "Hello gup," "Hello Jocko," "How do you like the zoo?" "Anybody home?" and "Boy, how much money you got?"

Jocko appeared in several talking newsreels. He will be replaced by another Mina, which was Jocko's understudy.

Laurence de Gusman, a Brazilian priest, was the recipient of the first aviation patent. It was granted to him by the king of Portugal after the priest had made a successful balloon ascension at Lisbon.

Macaroni products are said to have originated in China and Japan; but the Italians, who were using macaroni in the fourteenth century, learned about it from the Germans.

When Nature Steps In

U.S. Crop Reduction Program Is Not Needed

Nature, stepping in as an unwelcome assistant to the United States government's crop reducing program, has made it overhauled a goal or two. A survey showed that the figures aimed at in the five major divisions—wheat, cotton, corn, tobacco and hogs—either have been virtually reached or surpassed.

Drought, insects and floods gave the reduction drive a mighty but unwanted shove along its course.

It has become apparent to directors of the plan that some surprises they regarded as obnoxious a year ago would be needed to avoid shortages this year.

Wheat, the bread grain, averaged 84,812,200 bushels during 1928-32. The government sought to cut that down to 71,800,070. Now the July report indicates a crop of only 483,622,000 bushels.

The cotton program promises to hit the mark close. The average in 1928-32 was 14,657,000 bales and the farm administration sought to pull it down to 10,460,251 bales. Official indications now point to 10,195,342.

Recipes For This Week

(By Betty Barclay)

CHEESE CAKE

1/4 cup butter
5 egg yolks
5 egg whites (well beaten)
2 teaspoons lemon juice
1 teaspoon lemon rind
1 pound cottage cheese
2 tablespoons cornstarch
1/2 cup cream
5 egg whites.

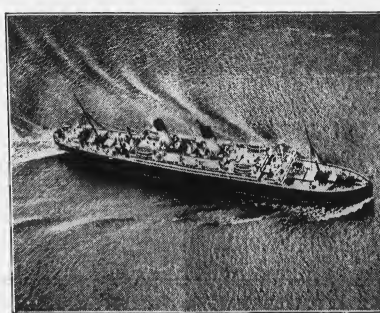

Cream the butter and add the sugar. When thoroughly mixed, add the egg yolks, lemon juice and rind. Beat thoroughly. Put the cottage cheese through a colander or ricer several times until very fine. Add the cornstarch and cream. Combine with the first mixture. Fold in beaten egg whites. Press corn flake pastry in the bottom of a spring form mold. Pour in the cake mixture. Sprinkle with finely grated almonds, sugar and cinnamon. Bake in a moderate oven (350 degrees F.) until firm, about one hour.

MACEDOINE OF VEGETABLES

2 carrots, cooked and diced
1 cup peas, cooked
1 cup string beans, cooked
1 onion.
1/2 cup celery, sliced
2 teaspoons sugar
1 tablespoon butter
1/2 cup meat stock or bouillon
Salt and pepper.

Slice the onion. Fry until soft in the butter. Add the other ingredients. Simmer gently until the vegetables are well heated and the stock is absorbed. Other combinations may be used according to what one has on hand.

NEW CUNARD WHITE STAR LINER

—Cunard White Star Photo.

Making her first arrival at Montreal under the house flag of the new Cunard White Star Limited, the E.S. Laurentic, big 19,000-ton liner docked at Montreal, Saturday, July 14, from Glasgow, Belfast and Liverpool. Her master is Captain R. Sewell Quinn, and she sailed out again from Montreal on her first departure under the new regime on July 20.

SUNDAY SCHOOL LESSON

AUGUST 5

ELISHA HELPS THE NEEDY

Golden Text: "Inasmuch as ye did it unto one of these my brethren, even these ye have done unto me." Matthew 25:40.

Lesson: II. Kings 4:1-44.
Devotional Reading: Psalm 41:1-4.

Explanations And Comments

A Widow Helped, verses 1-7. No one can read the miracles recorded in this chapter as wrought by Elisha without remarking their similarity to some of those recorded of Elijah. Both multiplied the substance of a needy widow's food, restored a dead child to life. The multiplying of the loaves and grain brings to our mind, of course, the miracle wrought by Jesus in feeding the multitude.

In our first story there is a widow in sore distress. The law allowed a creditor to take children as bondsmen for a debt—see Leviticus 25:39-41—and this woman's creditor was about to take away her two children. As she appealed to Elisha for help. The method which Elisha is said to have employed to relieve her distress differs from that of most miracles of the Bible. What had she in the house? Oil. Elisha took a pot of oil. Borrow all the empty vessels you can from your neighbors, fill them from the pot of oil which you possess, then sell the oil, pay your debts, and live upon the remainder of the sale price, was his counsel. Her needs were supplied by a divine mercy of which the oil that flowed as long as she had any empty vessel to receive it is a type.

Famine Sufferers Helped, verses 38-44. There was a great famine in the land and the prophets were in dire need. Elisha made noxious potage safe for them to eat, verses 38-41, and then he made a little food go a great way. With twenty barley loaves and a sack full of ears of grain, which had been brought to him as a present, he fed a hundred people. "What, should I set this before a hundred men?" his servant exclaimed in great surprise when directed to feed them all. Said Andrew to Jesus: "There is a lad here, who hath five barley loaves and two fishes: but what are these among so many?" John 6:9.

So to set it before them, and they did eat, and left thereof, according to the word of Jehovah. "According to the word of Jehovah," the ministry of this man was wholly a ministry of the word of the Lord. "By all his activity he was demonstrating to those who had the spiritual capacity to apprehend, how good and beneficent were the thoughts and instructions God concerning his people. His deeds were expiations of his message." (G. Campbell Morgan).

Strange Ceremony

Hindu Funeral Of Indian Princess Attracts Attention In England

Amazed villagers of Tooting, England, through a surrounding screen of canvas witnessed an exotic funeral ceremony as the body of the Princess Shunshere Jung, beautiful wife of a Nepalese minister to Britain, wrapped in winding cloth, was burned on a ghastly funeral pyre built of fragrant wood, Indian oils and butter costing \$2,500.

The ashes will be taken to India to be scattered on the sacred Ganges at Benares. Nepal, a forest kingdom in the foothills of the Himalayas to which white men are barred, is credited with full sovereignty by the British government, which was represented at the funeral for which special permits had been granted to allow it to be held according to the ancient Hindu rites.

In order to ascertain the suitability of potato flakes as cattle fodder, researches have been made in Germany where potato flakes have been manufactured for a number of years. Based on the feeding value of the product, a conclusion has been reached that they may be used with satisfactory results. Mixed with other feeding stuffs, they are said to be suitable for hogs and poultry.

Butterflies spend the cold winter months in various stages; some go through the winter as eggs, some in the chrysalis stage, some as larvae, and some hibernate in adult form.

Church steeples are descended from the tower of Babel, architecturally, the ancient idea being to approach heaven as nearly as possible in worship.

Agricultural Notes

Interesting Items Gleaned From Many Sources

Cattle can eat poison ivy with impunity but dogs are poisoned by it. For the past seven weeks, the amount of United States wheat in Canada has been shown as two bushels. On July 6 last year, the amount was 3,950,798 bushels.

In tests for feeding dairy cattle at Montana, it was found that the consumption of hay by growing heifers was increased by diluting molasses and sprinkling over the hay.

With the exception of corn and sugar beets which show increases, there is little change in the acreages of late-sown crops in Canada, according to the preliminary estimate.

The export of Canadian cattle to Great Britain for this year up to July 12 totalled 28,115 head as compared with 23,961 during the corresponding period of last year.

For the first 28 weeks of 1934, ending July 12, the number of hogs graded in Canada was 1,719,796, a decrease of 55,339 compared with the same period of last year.

Butter, raisins and dried currants, wheat and wheat flour are the four Australian products which do not receive the benefits of the British preferential tariff when imported into Canada.

"Handpicked" in the Fruit and Honey Act, 1934, means that, as applied to apples, pears, peaches, apricots, and cherries, they will be considered handpicked unless they show evidence of rough handling or of having been on the ground.

The exporting of approximately a million pounds of Canadian poultry during the last three or four months has had a very beneficial effect on the Canadian market and has opened up an encouraging avenue of trade for subsequent development.—Egg and Poultry Market Review.

The thorn apple, a poisonous weed belonging to the nightshade and potato family, has a variety of names—Jamestown or Jimson weed, stramonium, devil's apple, mad apple, and stinkwort. Canadian Indians speak of it as "the white man's plant." It was introduced into Canada among garden seeds.

Marketing of wheat in the prairie provinces up to June 29, 1934, as compared with the corresponding period of 1932-33, were, figures with in brackets being those for 1932-33: Manitoba, 27,753,972, (37,275,275) bushels; Saskatchewan, 106,419,159 (182,339,242) bushels; Alberta, 82,302,217 (140,804,307) bushels.

The methods used by our fathers are frequently held up to us as ideals. Many of these have been verified by scientific study, others have been disproven. I am sure our grandfathers tried to follow the best methods evolved by our forefathers and improve any of doubtful value. It is up to us to do the same. Science endeavours to establish the truth.—J. F. Hockey, Dominion Laboratory of Plant Pathology, Kentville, N.S.

Owes Freedom To King

Man Who Hurled Bottle At Royal Car Discharged

A man who hurled a bottle at the king and queen was discharged at police court hearing and, it was believed, had the king to thank for it. The object was thrown at Their Majesties were motorizing to Edinburgh from Harthill. It struck the pavement a few yards behind the royal car.

His Majesty expressed a wish the man be freed, it was understood.

Had Busy Holiday

During eight hours of liberty a ferret which escaped from its cage at night at a poultry farm in Masefield, England, killed 47 chickens. In its brief holiday it raised 20 poultry houses. When captured it was joyously starting to other adventures.

Prince George is to present to the Edinburgh Zoo three lion cubs given to him by the municipality of Lydenburg, Transvaal, during his present visit to South Africa.

LOCAL AND GENERAL

Andy Oliva of Nelson is here for
a few days.

Born: To Mr. and Mrs. W. J.
Harris, a son, July 31.

Born: To Mr. and Mrs. J. Ander-
son on Aug. 1, a son.

Ray Spillers is a patient in the
local hospital this week.

Mrs. W. G. Scott of Coaldale is
visiting Mr. and Mrs. V. Cyr and
Mrs. A. Hammer.

Mr. and Mrs. James Ford are on
two weeks vacation motoring in
British Columbia.

Mrs. J. Derbyshire and son Jack
returned last Friday, after spending
a week at Lethbridge.

Mrs. Woods, matron at the hospi-
tal, is on holidays. Miss Evelyn
Higinbotham is relieving nurse.

Margaret and Eileen Allan of
Tofield are visitors at the home of
Mr. and Mrs. Haysom.

Mrs. J. Porter of Claresholm is the
guest of Mr. and Mrs. T. Hol-
shead this week.

Mrs. A. Henderson of Lethbridge
is a guest at the home of Mr. and
Mrs. Wm. Pryde.

Mr. and Mrs. George Brown of
Blairmore spent a couple of weeks
at Crows Nest Lake, occupying
"Dunwurkin" cottage.

Mr. and Mrs. Hulbert of Calgary
returned on Monday after spending
the past few weeks at Crows Nest
Lake.

J. O. C. McDonald has been
spending part of his holidays at Ed-
monton and Coal Valley, Alta.,
visiting at the home of his daughter.

20 Boy Scouts from Lethbridge
arrived yesterday to camp two miles
north at the Scout camp, McGilliv-
ray Creek.

Mr. and Mrs. Fred Antrobus and
Freda returned on Friday evening
from two weeks motor trip to Van-
couver.

Mr. and Mrs. J. Richards and
Mr. and Mrs. Alan Brown left on
Saturday by car for Vancouver for
two weeks holidays.

Mr. and Mrs. J. M. Allan left on
Monday for two weeks holidays,
making a tour to various parts of
Alberta and B. C. points by motor.

Mrs. and Mrs. C. J. Devine and
children left early on Sunday morn-
ing for Kaslo for two weeks holi-
days.

Coleman football club suffered
their second straight defeat on
Sunday when they motored to Kim-
berley and were defeated 5-1.

Cultivate the goodwill of buyers
by advertising in The Journal, the
most effective medium for Coleman
merchants.

Linda DeCecio returns to-day to
Holy Cross hospital Calgary, after
spending three weeks holidays at
her home here.

A meeting of the Social Credit
study group is to be held this even-
ing in the United church club
room. Open to all who are inter-
ested.

Mr. and Mrs. James Fairhurst
left on Wednesday for Nelson and
Kaslo, B. C., where they will spend
a month's holidays enjoying the
restful beauties of West Kootenay.

Miss Margaret Robert is spend-
ing her vacation at the home of
her parents, Mr. and Mrs. D.
Robert, after having completed one
year as a nurse-in-training at the
Alberta university hospital.

R. J. Moore vice president of the
Alberta Amateur Hockey Associa-
tion, and Calgary manager for the
Heintzman Piano Co., was a busi-
ness visitor in the Pass towns last
week.

Coleman people visiting Leth-
bridge over the week end were Mrs.
W. L. Rippon, Mrs. J. O. C. Mc-
Donald, Miss Edith Haysem and
Miss Margaret Allen, formerly of
Coleman. Mr. and Mrs. L. Lindoe,
Wm. Roughhead, A. Balloch and
Sidney Short.

LOCAL AND GENERAL

Bill Hillas, former Colemanite,
was a Coleman visitor on Friday.

Mrs. J. Glendenning left this
afternoon for Chicago to attend the
international convention of the
Knights of Pythias, and to visit
Chicago Fair.

Miss Dorothy Reid, daughter of
Mr. and Mrs. W. E. Reid, spent
the past few weeks here with her
parents returning to her grand
mother's home in Pincher Creek.

The junior football team played
the Frank relief camp team last
week, winning by 4-2. Douglas
Moore scored three and G. Booth
one of the winning goals.

Almost 1300 head of sheep from
Lethbridge Experimental Farm are
being pastured near Crows Nest
Mountain, George Graham and
George Walker of Lethbridge being
in charge.

Rev. A. S. and Mrs. Partington
and children left on Monday morn-
ing for a month's vacation with
relatives in Winnipeg. Services at
the Anglican churches in Blair-
more and Coleman will be resumed
the first Sunday in September.

Mr. and Mrs. J. Houghton re-
turned on Sunday from two weeks
holidays in Vancouver and Calgary.
Mr. Houghton states the coast city
is more popular than ever judging
by the people there from the inter-
ior.

Coleman people seen at McBain's
lake on Sunday were: Reggie Jones,
Wyndham Jones, Miss McNab of
Lethbridge, Frank Heibien, Miss
J. Heibien, Reuben Johnson, Miss
Jean Pattinson, Miss Ruth Morrison,
Hector McDonald, J. D'Andrea,
Bert Westworth, J. A. McLeod.

Gaily be-ribboned automobiles
and honking horns announced to
all on Main street on Saturday
morning that a wedding party was
on its way to church. The happy
couple wedded were Miss Mary Ka-
palka and Mr. Thomas Bluba and
the ceremony was conducted by
Rev. Father Dunbar at Holy Ghost
church. The bride is the daughter
of Mrs. Andrew Harry and the
bridegroom is employed at McGill-
ivray mine. Their many friends
extend good wishes for a long and
happy married life.

"Anti-War" Meeting Postponed

An "Anti-War" meeting an-
nounced by placards on telephone
poles to be held on Thursday eve-
ning outside the skating rink was
postponed, according to the chair-
man of the local meeting, George
Gassoff. On Thursday and Friday,
Aug. 16-17, A. E. Smith, secretary
of the Canadian Labor Defence
League, is to hold meetings at Blair-
more, this being one of a series of
meetings being held from coast to
coast as a campaign demanding the
release of Tim Buck and others in
Kingston penitentiary, serving sen-
tences for various offences.

Balloch Loses Tennis Singles

(Continued from Page 1)

behind to win the game and the re-
maining games for the match.

The intense heat of 95 degrees
during play played havoc with a
number of players causing some to
default through exhaustion while
others felt listless and fatigued.

Magrath tennis players will be
seen in action on the local courts,
Sunday August 12.

ANNOUNCEMENT

Mr. Melville Anderson, of Anderson
& McLean, sight specialists, Calgary,
announces his next visit, to C. R.
Powers, Coleman, on

Friday, August 3, 1934

20 years' experience and regular
visits assure you of satisfaction in all
optical work.

Copy for news and advertising
should be in as early as possible on
Tuesday of each week. This facili-
tates publication on time, and would
be appreciated by the publisher.

Care in preparing copy helps the
printer set your advertisement the
way you want it. Be sure it is right
and you will be better served.

CLASSIFIED ADVERTISEMENTS

The Journal's Classified Advt.
columns provides an economical
and efficient medium for advertis-
ing at 2c a word, with a minimum
charge of 35c cash and 50c if
charged. You may have an article
to sell that someone would buy if
they knew of it. Spend a few cents
in making it known and turn it
into cash.
